

Henry “Hank” Schwartz

Graduated from the 13th Company with the USNA Class of '62. Went to Nuclear Power School and Submarine School. Served on three missile submarines and in between those tours was the Weapons System Officer at Squadron 14 in Holy Loch, Scotland. After 12 years in the submarine business, went off to the Navy's Graduate School in Monterey to pick up a Master's in Physics. After that graduation, headed off to the White Sands Missile Range to serve as the Navy's Test Officer.

From New Mexico, it was back to the Submarine business at the Charleston Naval Shipyard and Newport News Shipbuilding. After those two tours I was assigned as ComSubPac's Force Maintenance Officer. After two years in Hawaii, it was off to my final active duty assignment at NAVSEA.

Retired in July 1991 and continued to support NAVSEA, working closely with the Applied Physics Lab at Johns Hopkins University. Did some consulting work until my final retirement in 1998.

Served as Vice-President of the New Mexico Chapter under Casey, and as President during 2010-2013.
